**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 22-37 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claim 22 calls for a transportation location finder configured to identify a communication area based on movement information obtained from a traffic control that manages an operation of a transportation system including the transportation system including the transportation on which the mobile station is carried and a paging control configured to, when a call for the mobile station comes, to access the location information storage so as to find the communication area, where the transportation is situated, determined by the transportation location finder and cause a paging signal transmitted within the communication area.

The above limitations are not disclosed by the cited references of Kojima et al. and Tuohino et al., either alone or in combination. After further search and thorough examination, Claims 22-37 are found to be allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
